## ViP Powerline Phone Connector

The ViP Powerline Phone Connector allows your receivers to connect to a phone service through the power cords of the receivers and the electrical wiring in your home.

We encourage you to always connect your receiver to phone line in order to:

- Keep critical receiver data current
- Access thousands of online titles
- Order PPV using your remote control

**\$40.00** Includes standard shipping (continental US only).

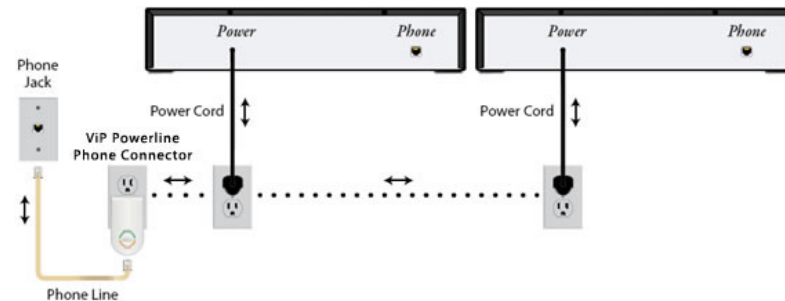

[Add To Cart](#)

## Warranty / Return Information

Includes a one (1) year warranty from the date of purchase.  
Item is non refundable once your order has been placed.

## How It Works

Using your home's power outlets, the ViP Powerline Phone Connector connects your ViP receiver to a phone jack located in another room without the cost or challenge of hard-wiring a new phone jack. Simply plug the ViP Powerline Phone Connector unit into a power outlet near a phone jack, and then plug it into a nearby phone jack. ViP receivers will use their own power cords to connect to the phone line via the ViP Powerline Phone Connector unit.

## Features

- Supports the Caller-ID and Call-Waiting features available through your receiver.
- Built-in surge protection for units. Do not plug units into a surge protected power strips.
- Compatible with other HomePlug technology.

## Compatibility

Receiver Models: 211, 211k, 222, 222k, 612, 622, 722, 722k, and 922.  
Device must be plugged directly into an electrical outlet or HomePlug certified power strip.

## Package Contents

- 1 ViP Powerline Phone Connector Unit
- 1 6-foot Telephone Cord: A 6 ft. telephone cord is provided to connect the unit to the existing wall phone jack.
