

Use as a wall charger

Troubleshooting

Before contacting customer support, here are some common resolutions to problems:

- Do you have the right tip for your device? Check iGo.com for the latest compatibility.
- Check to ensure connection to power source is secure and that there is power at the source.
- Check the connections to the device and tip to ensure they have not come loose.
- Ensure you have the correct tip and all connections are secure, then unplug unit from power source, wait 5 seconds, then plug back in.

Product Support

We are committed to providing our customers with first-class customer service and product support. For assistance, email iGo Product Support at support@igo.com.

Warranty

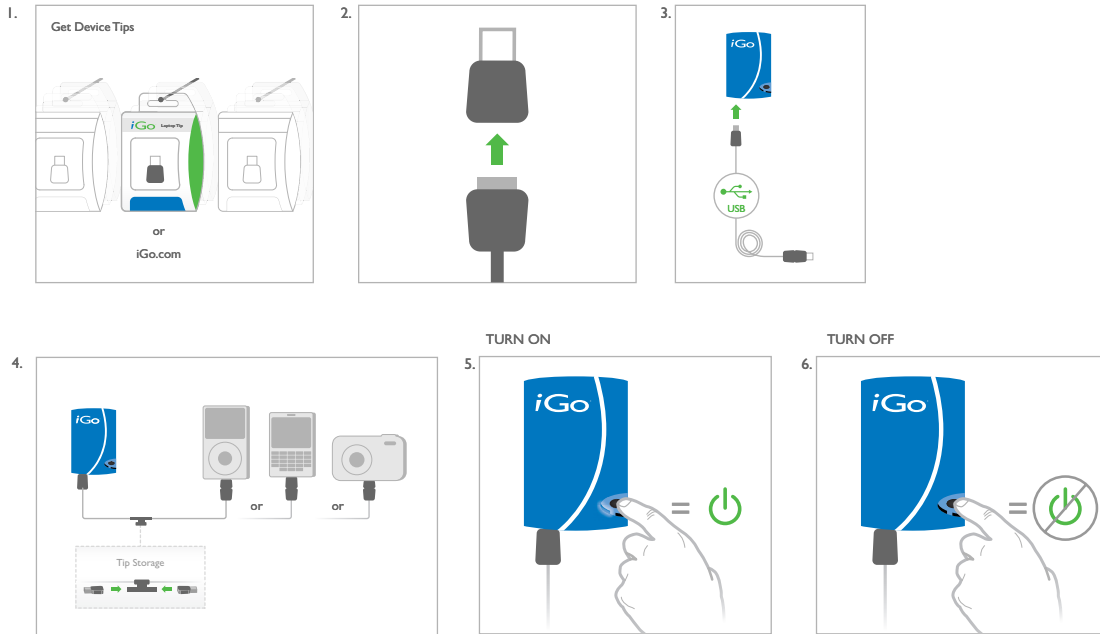

We warrant all iGo branded products against defects in material and workmanship for two (2) years from the original date of purchase. Please see enclosed Safety and Warranty information sheet for details.

Product Registration

Receive one additional year of warranty coverage plus special member-only offers when you register your product at www.iGo.com/register. Registration helps us serve you better; failure to register does not diminish your warranty rights.

iGo®
Getting Started

- Charging your devices
 - from the wall
 - away from a power source

Important Notices

Please read the following closely before using this iGo product. The maximum power output of the charger is shared when trying to charge two devices at once. If a device is not charging or is displaying an unusual charge indication, it may need more power than can be delivered. If this occurs, you can try turning off the devices while charging or just charge one device at a time.

If you use the iGo USB charging cable with a different USB power source, such as a laptop, be aware that some USB ports may not provide enough power to charge your electronic device. If the device does not charge correctly, use a higher-power port (some USB ports output more power than others). This information may be in your laptop's user manual. The USB charging cable is designed to power and charge all your devices and cannot be used for synchronization of data.

Contents

- Charger
- 6ft USB charging cable

Dimensions

Unit: 4.35 x 2.42 x 0.93"
 (110.5 x 61.5 x 23.8 mm)
 USB Charging Cable: 6' (1.83 m)

Specifications

Input 100-240 VAC; 50/60 Hz
 Output: 5W
 Battery Capacity: 1800 mAh

Operating conditions

Operating Temperature
 0°C to 40°C / 32°F – 104°F

Be Powerful. Eliminate Waste.

Using one iGo charger with power tips instead of multiple chargers saves you money and produces less waste.

Save Energy.

Look for new products with iGo Green™ Technology. These products automatically reduce standby power by up to 85%, conserving resources and saving money.
