EN210/DI/512MD2(LP) VGA Card

SKU # : EN210/DI/512MD2(LP)

Low Profile Corporate Stable Model VGA Card

The EN210/DI/512MD2(LP) is covered by the Corporate Stable Model Program, which offers a one year guaranteed shelf life and RMA cross-shipping. Based on the NVIDIA® GeForce® 210 GPU with 512MB of DDR2, it delivers the power needed for graphics-intensive applications in businesses, schools, or medical facilities. The EN210/DI/512MD2(LP) is a low profile card and comes bundled with a bracket that allows for small form factor installations, so it is excellent for builds that require strong graphics in a limited space. With Dual-link DVI support, it is able to drive the industry's largest and highest resolution flat-panel displays up to 2560x1600.

Energy/Environment Standards

EPA Energy Start Complient	No
EPEAT Complient	No
EPEAT Level	N/A

Product Highlights

ASUS CORPORATE STABLE MODEL (CSM) PROGRAM
To deliver the product longevity and support you demand, ASUS guarantees a one-year shelf life and aggressive support from the date of introduction for every CSM model, meaning that system builders can implement a standardized solution that will require fewer resources to maintain. When service is needed, ASUS motherboards can be cross-shipped to minimize downtime. All CSM motherboards are covered automatically, purchased in any quantity.

GEFORCE 210 GPU
The EN210/DI/512MD2(LP)'s GeForce 210 GPU is robust enough to support most graphics-intensive tasks demanded in commercial environments such as video editing, design cooperative learning and more.

ASUS SPLENDID VIDEO ENHANCEMENT TECHNOLOGY
Built on a proprietary color engine, Splendid automatically determines the nature of the user's current task and adjusts optimal color settings. It boasts robust brightness, sharpness and contrast correction capabilities.

ASUS SMART DOCTOR
Smart Doctor is a group of intelligent hardware protection and overclocking tools. Users can monitor the system's fan RPM, AGP power level, GPU temperature and RAM temperature. A slide bar is included for manual overclocking.

HYPERDRIVE AND SMARTCOOLING
Embedded HyperDrive and SmartCooling technologies dynamically overclock and adjust fan speed for optimal performance and convenience.

Segment Focus

Business: In business installations space is often at a premium, and the EN210/DI/512MD2(LP) VGA card is suitable for small form factor installations. The ASUS Corporate Stable Model program offers a guaranteed one-year shelf life, enabling companies to offer their clients a high quality, high value solution that in-house IT departments can quickly master.

Education: Video is an increasingly important tool in education. The EN210/DI/512MD2(LP) VGA card will deliver smooth HD video playback to projectors or large monitors for multi-viewer usage.

Warranties and Services
• Three year warranty
• Corporate Stable Model Program
• AdvanceService cross-shipping
• 24/7 tech support

Specifications

GPU	GeForce 210
Video Memeory	512MB DDR2
Engine Clock	589MHz
Memory Clock	800MHz (64 bit)
DVI Max Resolution	2560 x 1600
Bus Standard	PCI-E 2.0
DirectX 10.1 Support	YES
HDMI Output	Yes (Native HDMI)
Standard Output	DVI-I, D-Sub Output
HDCP Compliant	YES
Low Profile	YES
Date Declared CSM	9/9/2009
